

**Dayton Trichology Clinic's Ultra Scalp Prep** breaks up and dissolves sebum. After Scalp Therapy has hydrated the outer layer and dissolved the sebum, Minoxidil in carrier solution or Maximum Growth Therapy will penetrate down to the dermal papilla. Remember, Minoxidil and Maximum Growth Therapy only works at the dermal papilla level, not on the scalp, so if it can't penetrate it can't work to re-grow hair.

**Before Ultra Scalp Prep**

**5-10 minutes after Ultra Scalp Prep**

**Directions:** Shake well before using. Apply 10 - 12 drops on the scalp and massage gently with fingertips into the treatment area. Wait 5 - 10 minutes and then apply Dayton Trichology Clinic's Ultra Scalp Prep

- **Dissolves scalp sebum build-up**
- **Soothes dry irritated scalp & stops itching**
- **Helps aid in Minoxidil and Topical penetration**
- **Provides high concentrations of hair strengthening vitamins**

## How Does Dayton Trichology Clinic's Ultra Scalp Prep work?

Dayton Trichology Clinic's Ultra Scalp Prep revitalizes your scalp by making it clean and removing excess sebum oils and debris that can block the follicle, restricting new fragile hair from coming through the scalp. Scalp Therapy is scientifically proven and laboratory tested to work beneath the scalp surface to increase nutrient and blood flow in the root area and help dissolve excess sebum; thus creating an environment for maximum hair growth Scalp Therapy significantly aids in the penetration of Minoxidil or Dayton Trichology Clinic's Ultra Scalp Prep and other Topicals helping them penetrate and work to their fullest.
